

PERSONAL SECURITY & SAFETY ADVICE

WHILST AT HOME

If someone knocks on your door, ensure that you know who it is before you open it.

Patio doors are often the easiest access point to break into a house, so ensure you use a secondary locking system on them.

Identify a room in the upstairs of your home that you can take your family to in the event of a home intrusion to barricade yourselves in.

If you think that there is someone in your home, call 999 immediately.

DO NOT try to approach them.

If a burglar demands something from you, hand it over to them immediately.

DO NOT resist.
