

PERSONAL SECURITY & SAFETY ADVICE

WHILST ON HOLIDAY

Save the numbers for the embassy and emergency services before you travel.

Some locations don't have smoke detectors as standard, so carry one with you for your room.

If you've travelled by business or first class, take the tags off before you leave the airport.

Read the evacuation plan on the back of your hotel door and know where you need to go in the event of an emergency.

Have an emergency bank card and cash hidden in your room to use in case you lose your wallet or purse.

Only use reputable transport providers, preferably arranged through your hotel.

In less well off areas, be mindful that an expensive watch or jewel's could be an attractive item to have stolen.

If you feel lost, try to blend in and act confident, like you know where you are.

Trust your instincts and if you feel uncomfortable, leave the area.
